GWL Thank You App Feature Documentation

Platform: Shopify Embedded App | Checkout UI Extensions | Developed by Galaxy Weblinks

This document provides a complete reference for the GWL Thank You App, covering Admin Panel functionality, checkout customization setup, thank-you page extension blocks, click analytics, and QA flows.

Latest Enhancements

Enhancement	Summary
NEW Home Page Checkout Customization CTA	App home page includes a primary setup call to action that opens Shopify Admin checkout settings for customizing thank-you page blocks.
NEW Embedded Analytics Dashboard	Merchants can view total clicks, today's clicks, click counts by type, and the most recent tracked interactions.
NEW Dynamic Product Recommendations	Recommended products are pulled from the purchased products' <code>custom.recommended_products</code> metafield and displayed on the thank-you page.
NEW Multiple Configurable Thank-You Blocks	Subscription, loyalty, referral, discount, FAQ, video, and upsell blocks can be added through Shopify checkout customization.
NEW Server-Side Click Storage	Extension interactions are sent to the app API and stored by shop, event type, order, CTA, item, source, and timestamp.

SECTION A - Admin Panel Features

1. Dashboard Home

The Dashboard is the app landing page. It gives merchants a quick performance snapshot and a direct path to Shopify checkout customization.

Feature	Description
Performance Snapshot	Displays Total clicks, Today, and Last 7 days values from tracked thank-you page interactions.
Recent Activity	Shows the latest five click events with date, event type, and the clicked item or CTA text.
Top Signal	Aside panel highlights the most frequent click event type from the last 7 days.
View Analytics Button	Primary action that navigates to the app Analytics page.
NEW Customize Checkout CTA	Opens Shopify Admin checkout settings: <code>https://admin.shopify.com/store/gwl-apps-demo/settings/checkout</code> .

2. Analytics

The Analytics page provides click reporting across all thank-you page blocks that call the shared tracking helper.

Feature	Description
Total Clicks	Counts all tracked click records for the authenticated shop.
Today Clicks	Counts records created since the start of the current day.
Clicks by Type	Groups events such as Subscription Click, Loyalty Click, Referral Click, Video Click, FAQ Click, and Recommended Product Click.
Recent Clicks Table	Lists up to 50 recent clicks with date, type, and an available link to the clicked CTA or product.

3. Click Tracking API

Item	Description
Endpoint	<code>/api/analytics-click</code>
Stored Fields	Shop, event type, order ID, order number, CTA text, CTA link, item ID, item title, item URL, source, raw payload, and created date.
CORS Support	Supports extension-side POST and OPTIONS requests with permissive CORS headers.
Shop Validation	Requests must include a shop domain before a click record is saved.

SECTION B - Checkout Customization and Extension Blocks

All customer-facing modules are Shopify Checkout UI Extensions targeting `purchase.thank-you.block.render`. Merchants add them from Shopify Admin checkout customization; no theme code editing is required.

4. Available Thank-You Page Blocks

Block Name	Purpose	Customer Interaction
Thank You - Subscription Section	Promotes subscription, membership, or repeat-purchase offers.	CTA button opens merchant-configured URL and tracks <code>subscription_click</code> .
Thank You - Loyalty Section	Promotes a loyalty or rewards program after purchase.	CTA button opens merchant-configured URL and tracks <code>loyalty_click</code> .
Thank You - Referral Section	Promotes referral incentives such as give/get reward programs.	CTA button opens merchant-configured URL and tracks <code>referral_click</code> .
Thank You - Discount Section	Displays a discount code for the customer's next purchase.	Customer views the configured discount code on the thank-you page.
Thank You - FAQ Section	Displays up to 10 frequently asked questions and answers.	Opening an FAQ answer tracks <code>faq_click</code> .
Thank You - Video Section	Displays a video thumbnail and heading linked to a hosted video.	Thumbnail click opens video URL and tracks <code>video_click</code> .
Thank You - Upsell Section	Shows product recommendations based on purchased product metafields.	Product image/link click opens product URL and tracks <code>recommended_product_click</code> .

5. Checkout Customization Setup

Step	Admin Action
1. Open App	Open the GWL Thank You App in Shopify Admin.
2. Use CTA	Click Customize checkout from the app home page.
3. Select Checkout Profile	Choose the active checkout profile and open the checkout editor.
4. Navigate to Thank-You Page	Switch the editor view to the thank-you page area.
5. Add App Blocks	Add one or more GWL Thank You blocks from the Apps section.
6. Configure Settings	Enter headings, descriptions, CTA text, CTA URLs, discount code, FAQs, or video URLs as needed.
7. Save	Save the checkout customization and place a test order for validation.

6. Block Settings Reference

Block	Settings	Validation
Subscription	Heading 1, Heading 2, CTA Text, CTA Link	60, 120, 24, and 2048 character maximums.
Loyalty	Heading, Description, CTA Text, CTA Link	60, 160, 24, and 2048 character maximums.
Referral	Heading, Description, CTA Text, CTA Link	60, 160, 24, and 2048 character maximums.
Discount	Discount Code	32 character maximum.
FAQ	FAQ Question 1-10 and FAQ Answer 1-10	Questions: 80 characters. Answers: 240 characters.
Video	Video Heading, Video URL, Video Thumbnail Image	60, 2048, and 2048 character maximums.
Upsell	No merchant-facing extension settings.	Recommendations come from product metafields.

SECTION C - Customer-Side Experiences

7. Subscription CTA Flow

Step	Customer Experience
1. Order Complete	Customer lands on the thank-you page after checkout.
2. Offer Visible	The configured subscription heading, description, and CTA are displayed.
3. CTA Click	Customer clicks the CTA and opens the configured subscription URL in a new tab.
4. Tracking	The app records event type <code>subscription_click</code> with CTA and order context.

8. Loyalty and Referral Flow

Step	Customer Experience
1. Block Displayed	Customer sees a loyalty or referral promotion on the thank-you page.
2. CTA Click	Customer clicks Join Now, Refer a Friend, or merchant-configured CTA text.
3. Destination	Configured CTA URL opens in a new tab.
4. Tracking	The app records <code>loyalty_click</code> or <code>referral_click</code> .

9. Discount Code Flow

Step	Customer Experience
1. Block Displayed	The customer sees a "Discount code" card on the thank-you page.
2. Code Visible	The configured code is displayed in a bordered code area.
3. Fallback	If no code is configured, the block displays "No code available".

10. FAQ Flow

Step	Customer Experience
1. FAQ List	Configured FAQ questions appear as expandable buttons.
2. Open Answer	Customer opens a question to reveal the answer.
3. Tracking	Opening a closed FAQ records <code>faq_click</code> with the question text.
4. Empty State	If no valid FAQ pairs are configured, the block shows "No FAQs configured".

11. Video Flow

Step	Customer Experience
1. Block Displayed	Customer sees a heading, helper text, and 16:9 thumbnail image.
2. Thumbnail Click	Video URL opens in a new tab.
3. Tracking	The app records <code>video_click</code> with the heading and URL.
4. Required Settings	The block renders only when both Video URL and Thumbnail Image are configured.

12. Recommended Products Flow

Step	Customer Experience / System Behavior
1. Order Context Read	The block reads order ID, order number, shop domain, and storefront URL from checkout context.
2. API Request	It calls <code>/api/recommendations</code> with order data.
3. Metafield Lookup	The API reads each purchased product's <code>custom.recommended_products</code> product reference metafield.
4. Recommendations Displayed	Up to 8 recommended products are shown with image, title, and product link.
5. Product Click	Clicking a product records <code>recommended_product_click</code> .

SECTION D - QA Test Script

13. Admin Setup QA

Step	Expected Result
Open the app home page.	Dashboard loads with heading "Thank You Dynamic Solutions".
Verify Performance Snapshot.	Total clicks, Today, and Last 7 days cards are visible.
Click View analytics.	Analytics page opens inside the embedded app.
Return home and click Customize checkout.	Shopify Admin checkout settings opens in a new tab.
Add each Thank You app block in checkout customization.	Blocks can be added without theme code changes.
Save checkout customization.	Shopify saves the configured thank-you page layout.

14. Customer Flow QA

Step	Expected Result
Place a test order.	Customer reaches the thank-you page after checkout.
Verify configured blocks.	Subscription, loyalty, referral, discount, FAQ, video, and upsell blocks appear as configured.
Click subscription, loyalty, referral, and video CTAs.	Each opens the configured URL in a new tab.
Open an FAQ item.	Answer expands and the FAQ interaction is tracked.
Click a recommended product.	Product page opens and click is tracked.
Open app Analytics.	Click totals and click types update with the tested interactions.
Open app home page.	Recent Activity shows the latest tracked click events.

15. Recommendation Metafield QA

Scenario	Expected Result
Purchased product has recommended product references.	Recommendations display on the thank-you page.
Recommended product is also in the purchased product list.	Duplicate purchased product is excluded from recommendations.
No recommendation metafields are configured.	Block displays "No recommendations found".
Order ID is unavailable.	Block displays an order ID error state.

Appendix A - Event Type Reference

Event Type	Triggered By	Primary Data Captured
subscription_click	Subscription CTA button	CTA text, CTA link, order ID, order number, shop, source.
loyalty_click	Loyalty CTA button	CTA text, CTA link, loyalty heading, order context.
referral_click	Referral CTA button	CTA text, CTA link, referral heading, order context.
faq_click	Opening an FAQ answer	Question text as CTA text and item title.
video_click	Video thumbnail link	Video heading, video URL, order context.
recommended_product_click	Recommended product image or link	Product ID, product title, product URL, CTA text.

Appendix B - Technical Reference

Area	Reference
Embedded App Routes	/app , /app/analytics
Extension Target	purchase.thank-you.block.render
Checkout Customization URL	https://admin.shopify.com/store/gwl-apps-demo/settings/checkout
Analytics Endpoint	/api/analytics-click
Recommendations Endpoint	/api/recommendations
Recommendation Metafield	custom.recommended_products
Production App URL Used by Extensions	https://thankyouapp-production.up.railway.app
